(The Monroe Institute Bulletin, June 1986)

QUARTERLY EXPLORER TAPE

Aspects

This quarter's Explorer tape deals with a theme that's been surfacing for over a year in Explorer sessions at the Research Laboratory. The concept is one that the entities who introduced it call "aspects."

According to the Friends—our name for the group energy that communicates through Explorer IMEC—the consciousness of every individual is overlaid with countless aspects that make up the individual's personality and emotional characteristics.

This excerpt from two sessions with IMEC not only provides dramatic and often humorous demonstrations of aspective energies, but it also explains how this information can be put to use for personal growth.
